The “May visit” to Brod

On the occasion of the commemoration of the Czech liberation, the Brielse delegation visited Havlíčkův Brod. It has become a tradition that we, as a reward for the received Christmas tree, bake something delicious for the visitors of the Craft Market on the 8th of May. This year, hundreds of “oliebollen” were made, which were distributed by visitors from Brielle on the market. And the people from Brod showed notice that the oliebollen tasted delicious. As an added attraction people could “sjoelen” again. On this market are annually dozens of stalls selling handcrafted goods.

The unveiling of "Komunikace"

September 17 - 2016

14:00 hours

Havlíčkův Brod roundabout - Brielle

The artwork "komunikace" which will be unveiled on September 17 at 14:00 hours at the Havlíčkův Brod roundabout in Brielle, is an initiative of the Havlíčkův Brod Brielle Committee, which wants to spread objective communication between people of different cities, with a different background or culture. So they get to know, to understand and appreciate each other. HBBC will be helpful to realize this goal.

Info about the artwork

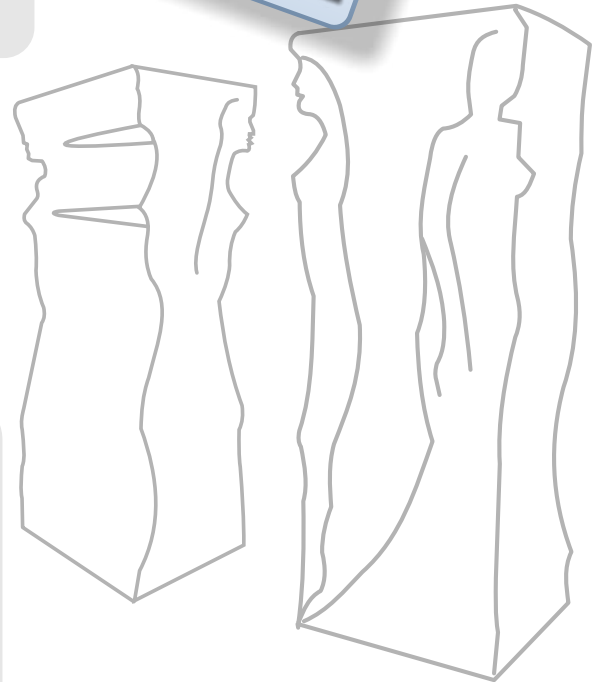

Komunikace Radek Dvorák

The concept of communication is the basis for the two sculptures on the roundabout.

An imaginary rotation of the two blocks would bring several female figures at the eight corners in close proximity. Only two of them communicate permanently. In this imaginary rotation, the female figures are more and more worked out. The others communicate with the audience, with themselves or who knows who

The artworks on the roundabout on the corners gives an effect of "abstract to specific," when you drive on the roundabout. At the same time, the figures show the different stages of the sculpting and the creation of the work.

Mathematics and geometry are for Radek Dvorak very important and form the basis for his work. Michelangelo's unfinished sculpture "Slaves" served as inspiration for this artwork. Also historic sculpture, such as Romanesque and Gothic column headings, is a source of inspiration. Through the use of the corners of the stone and to chop away as little material as possible, a monumental work of art is created.
